Tybalds Regeneration News

March 2019

This newsletter provides a summary of the Drop-in held on 21 January 2019 between 3pm and 8pm. All Tybalds estate residents were invited to attend the Drop-in by a hand delivered flyer.

Regeneration

At the event in the Blemundsbury RA Hall, residents were able to comment on the some regeneration proposals to build new homes and improve the landscaping and community facilities on the estate.

Better Homes

The contract manager for Better Homes was available to provide more information and answer questions about the programme of external repairs that is due to begin in the summer.

Recycling and Waste

A representative from Veolia was able to promote recycling and waste management.

Landscape

We have involved Camden's Green Spaces team to assist with the design and maintenance of the landscape and play areas. A representative from the team was present.

District Heating

The boilers in Springwater are due for renewal this summer and the contracts manager for Mechanical and Electrical services was able to provide information about it.

Here are some of the main things that residents told us:

- The smaller scale regeneration proposals will cause less disruption.
- The new homes should be attractive, affordable and energy efficient.
- Any new buildings should not be sited too close to existing blocks.
- There should be regular information updates and lots of opportunities for residents to comment on and be involved in the plans as they develop.
- Concerns about security and fly tipping on the estate were raised.
- Some residents would like more trees and plants on the estate.
- It was suggested that there should be more places for older people to sit and better facilities for children and teenagers to play.
- Other people were concerned that more seating may encourage anti-social behavior, especially at night.

Selecting landscape designers

At the Drop-In, residents were asked if they would like to be involved in selecting the Landscape Designers.

Interviews took place on 28 January in the RA hall.

All seven residents who had said they wanted to, participated in the selection interviews.

MUF will be working with Tybalds residents to look at ways of improving planting, play and community safety.

We will let you know when the next consultation events will be happening as soon as we have firm dates.

Tybalds TRA Halls

A proposal to relocate the Falcon TRA hall received comments from residents involved in running the hall. The reason for providing a new hall would be to use the existing TRA hall space for new homes.
