

Your Business Loading and Access requirements on Albany Street

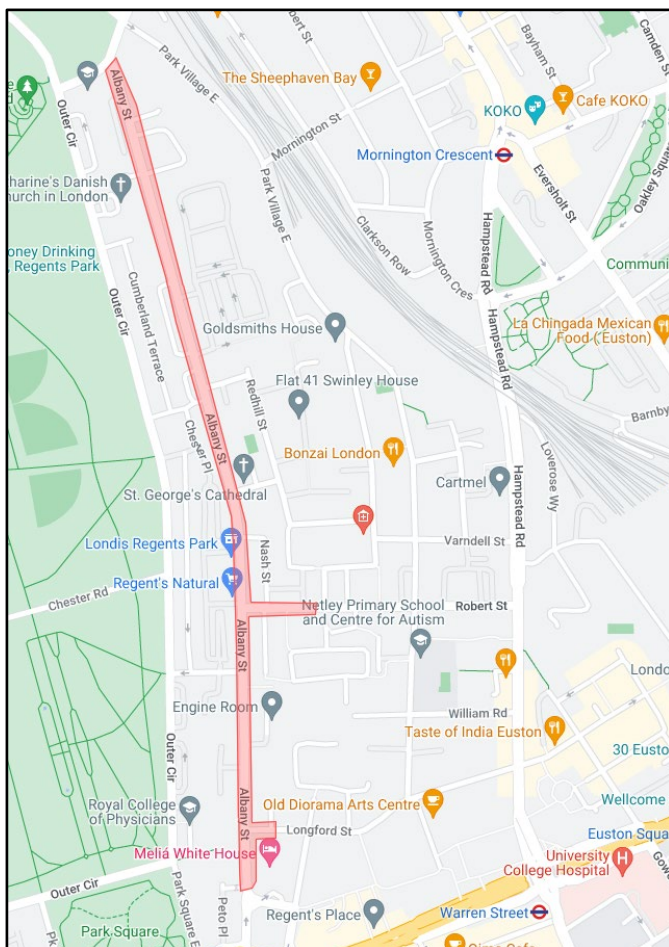

Dear Business Owner,

At Camden we're developing proposals for cycling, walking, road safety and improvements plus exploring areas for new plants and trees on Albany Street.

The project aims to introduce safer cycle infrastructure on Albany Street, which could include cycle tracks that physically separate cyclists from traffic. Junctions at Robert Street and Gloucester Gate would also be key focus areas for safety improvements for both cyclists and pedestrians. We would also like to improve crossings for pedestrians throughout the street and to introduce more plants and trees.

The full extent of the Albany Street project area is shown below.

Before we develop our proposals, we want to understand how you load and service your business so that we can better design a project that supports the needs of local businesses.

We would like to invite you to fill out a short survey using the link or QR code below:

[Camden.gov.uk/consultation](https://www.camden.gov.uk/consultation)

If you'd prefer to receive a paper a copy or this information in another language or larger size, get in touch with us on **020 7974 4444** or email

safetravel@camden.gov.uk.

We will use feedback gathered from this survey to create our designs and will then consult on any changes at which point you and other stakeholders, will have an opportunity to provide further feedback.

We look forward to hearing from you.
