

Camden's new Climate Action Plan 2026 – 2030

Tell us what you think

We want Camden to be green,
healthy and safe for everyone.

We need a plan to make this happen.

To make our plan we spoke to lots of
different people.

This helped us to choose 7 important
things that our plan will focus on.

Now we want to share our plan with
you.

1.Greening & Growing

We will plant more trees in streets, parks and estates.

We will make green spaces cooler and safer in hot weather.

We will help nature adapt to a changing climate.

We will support community gardens and growing.

We will use plants to help stop flooding.

2. Local Circular Economy

We will help people repair and reuse things instead of throwing them away.

We will reduce food waste and share more food.

We will help businesses cut waste and share resources.

We will make recycling more accessible.

3. Council Operations

The Council will make its own buildings use less energy.

The Council will use more electric vehicles and fewer petrol or diesel ones.

The Council will buy goods and services that are better for the planet.

The Council will train its staff to think about climate in every decision.

The Council will lead by example so others follow.

4. Buildings & Retrofit

We will help make homes warmer in winter and cooler in summer.

We will help people use less energy and pay smaller bills.

We will add more solar panels and clean heating.

We will make schools and workplaces more energy efficient.

We will protect buildings from floods and extreme heat.

5. Enablers

We will make it easier for people to take climate action.

We will help find money to pay for green projects.

We will make sure new buildings use less energy and are warm in winter and cooler in summer.

We will share ideas with others that work well in Camden.

We will work together with partners to make bigger changes.

6. Empowerment, Education & Communication

We will give clear advice on how to take climate action.

We will help vulnerable people understand how to stay safe in hot weather.

We will help give people skills for green jobs.

We will share climate news in clear, simple ways.

7. Sustainable Travel

We will make it easier to walk, wheel and cycle safely.

We will help give access to public transport and shared travel.

We will add more electric vehicle charging points.

We will encourage others not to use their cars, vans and lorries.

We will make streets safer, greener and more welcoming.

Thank you for reading our plan

We want to know what you think.

What do you like?

CHANGE

What should change?

What is missing?

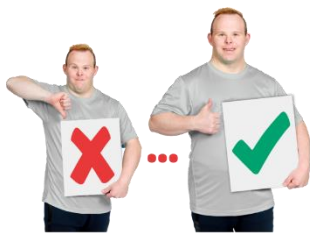

You can tell us by:

- Filling in our form online.

- Sending us an email.

Your ideas will help us make the best plan for Camden.
