

Car Clubs

Car Clubs operate across the borough with dedicated car club parking bays.

Residents and businesses can join a car club and use a car without owning one. Car clubs are charged per parking space. The proposed changes for Car Club operators will apply carbon emission-based charges and the Air Quality Surcharge as well as restrictions to higher polluting vehicles.

Car Clubs	
Current	'Car Club permit holder only' bays have a separate rate with an equivalent daily charge being £0.89 .
Proposed	Car Clubs will be charged at the same rate as businesses . Proposed equivalent daily charges range from £1.09 to £2.48 , for more details including annual fees, please refer to Business Permits.
Current	No carbon emission related charges are applied.
Proposed	Carbon emission-based charges will be introduced and Air Quality surcharge will replace Diesel Surcharge reflecting the impact of older petrol vehicles as well as older diesel vehicles on air quality. The surcharge applies an additional charge to both older diesel** and petrol* vehicles.
Current	High emission vehicles can be granted a permit.
Proposed	Only cars with emissions up to 150g/km will be granted a permit.

*Vehicles first registered prior to September 2015

**Vehicles first registered prior to September 2019

Please note that the methodology used to calculate the equivalent daily charge has been checked and updated and these figures have now been substituted. This clarification only relates to the charges set out in the Tables titled 'Current Terms of Use and Proposed Changes'.
